

Thank you for purchasing the Yamaha FW16E.

The FW16E is an expansion board based on the high-performance IEEE1394 serial bus and data communication protocol. The FW16E adds two IEEE1394 connectors to an FW16E-compatible device, such as the Yamaha MOTIF XF Music Production Synthesizer. By connecting to a computer in a peer-to-peer connection via an IEEE1394 cable, you can transfer audio data for all channels and MIDI data for all ports simultaneously between the FW16E-equipped device and the computer.

In order to take full advantage of the FW16E's functionality, please read this manual carefully. After reading this manual, please keep it available for future reference.
